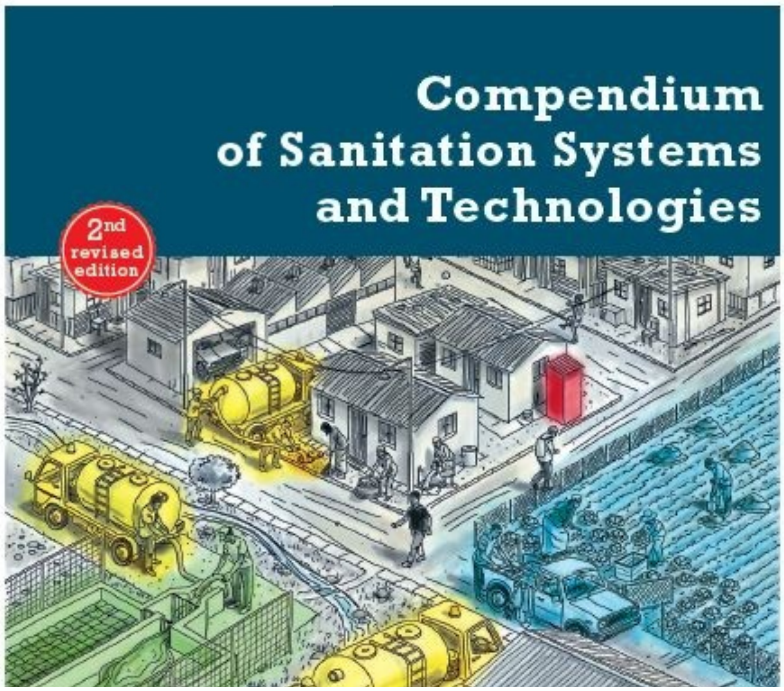
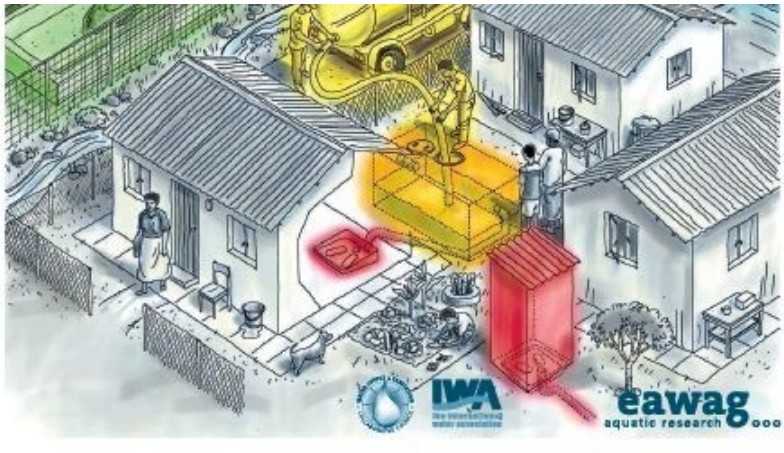
Compendium of Sanitation Systems and Technologies





The Compendium of Sanitation Systems and Technologies was first published in 2008 during the International Year of Sanitation, and the Second Edition will be published in 2014. The document's popularity is its brevity - ordering and structuring a huge range of information on tried and tested technologies in a single document. As in the first edition we present only proven technologies that are appropriate for low- and middle-income settings. Also, we include only "improved" sanitation technologies, featuring safe, hygienic, and accessible sanitation. In this eCompendium edition we present the whole range of urban, peri-urban and rural technologies (e.g. from simple pits to conventional sewers).
